DETERGENT PACKAGING

Detergent drain back bottles are often made from extruded blown HDPE plastic due to its high resistance to chemical abrasion and degradation.

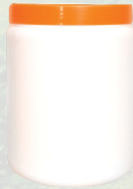

Our packaging solutions are designed to keep you safe, preserve the integrity of your chemicals, protect the environment, and provide convenient handling and storage.

OUR VALUABLE CLIENTS

range of products

5 GALLON PC BOTTLE

Polycarbonate (PC) is an amorphous high molecular engineering plastic sourced only from the top two European suppliers. PC bottles are durable, can go through over 100 refilling cycles and are light weight. The material fulfills all requirements placed on Polycarbonate for food contact applications worldwide.

KEY FUNCTIONALITIES OF 5 GALLON BOTTLE:

- Specially designed crack resistant solid neck finish
- Thermally stable from 100 C to +135 C, suitable for all type of cleaning methods
- Material is neutral. Hence no taste is imparted to filled water
- Outstanding impact strength
- Great weather ability characteristics even in prolonged out door exposure
- Excellent optical property High Transparency
- Dimensional stability Good heat resistance
- Virtually stress free bottles for extended number of refills
- UV stability & aesthetically pleasing
- Food grade Safe for drinking water application

BOTTLE WITHOUT HANDLE

BOTTLE WITH HANDLE

5 GALLON PE CAP

Injection molded Non Spill Polyethylene Snap On Caps are produced on fully automatic machine and assembly lines untouched by hands. Caps are designed to fit almost all refillable 5 gallon PC and PET bottles of 55mm Neck

The injection molded parts like cap body and plug is made of 100% virgin food grade PE and the foam material is free of Azodi carbonamide and Semi carbazide as per EU Food and Safety Regulations.

KEY FUNCTIONALITIES OF 5 GALLON BOTTLE:

- Spill proof air tight seal between the cap and bottle seal area
- Perfect tear propagation along the notch while breaking tamper evidence band
- Easy peelability of top label
- Cooler friendly center seal opening while loading on coolers

PET BOTTLES

The new PET bottles like Handwash / Sanitizers, Dishwash, Ketchup and vinegar bottles are light, shatter proof, and consumer appealing.

PET BOTTLES PACKAGING PERSONAL & HOME CARE PRODUCTS

Trust EPI for Your Beauty Packaging and Dispensing Solutions, Consumer Goods, And Home & Garden Packaging Solutions.

Packaging that is appealing to the eye and to the touch is important in the personal and home industry. The shape, function, and design of closures and bottles are key factors that give our clients an edge over the competition. It takes unique and customized designs to preserve the chemical composition and fragrance of products in this category.

LUBRICANT DRUM

EPI tight-head plastic drum is sealed at the top and bottom. They have a closed head, meaning that there's no removable lid at either end. Tight-head plastic drums are therefore completely sealed, aside from two designated openings that are used to funnel liquids in or out. These small openings are themselves sealed with secure bungs.

Because they are sealed, tight-head drums are often thought to be more secure than open-head plastic drums.

All industries such as Lube, Edible Oil, Adhesives, Chemicals, Detergents etc.
